Bélisle

Established in St-Jean-de-Dieu, Québec, since 1997, Bélisle Industries commits to the highest level of quality for its growing clientele by specializing in the design and manufacture of complex molds and parts that demand absolute precision.

Within a few years, Bélisle Industries developed a solid expertise in high-quality metal machining. In 2001, the success of the company prompted investments that doubled the surface of its manufacturing plant. Brand new, high-performance machinery was also acquired.

2003 paved the way for new challenges and the company expanded its activities. Newly recruited specialists brought benefits to the company with advanced skills in designing, manufacturing and maintaining patterns and molds required for injection and gravity molding processes.

Quality Assurance and Control

The staff at Bélisle Industries focuses on quality. Accuracy, consistency and client's satisfaction are the team's main concerns. In order to maintain high-quality standards, specialists carry out every step of the design and manufacturing process.

To support the quality-dedicated staff, strict control protocols are applied by the quality control department using advanced tools. We are able to ensure the delivery of parts without defects. Bélisle is proud to offer constant quality to its partners throughout the most complex and demanding projects.

Molds and Patterns

The design and manufacturing of reliable precision tooling that performs well is not a profession, it is an art. Bélisle Industries is more than a basic manufacturing company. In-house experts are dedicated to the production of exceptional molds and patterns

Bélisle's partners get more than manufacturing services: they gain access to a proven know-how. Clients benefit from our vast experience in mold bases, mold inserts, patterns, trimming tools and related components. Bélisle Industries works hand in hand with its partners in order to optimize all projects; helping out clients from product design to surface finishing is not a duty but a pleasure.

Machining and fabrication

Constant technological progress is at the heart of high-accuracy machining. Clients from various industries continuously express their satisfaction with the expertise found at Bélisle Industries. Over the years, Bélisle developed a unique competence in machining cast parts and is able to meet the most exacting demands.

Moreover, turnkey projects encompassing prototypes, procurement of rough material or castings, machining, surface finishing and assembly are routinely executed. Bélisle Industries serves leading edge industries such as transportation, automotive, recreational vehicles and industrial equipment.

Bélisle Industries adapts easily to clients needs and demands. Contact us for all your application requirements.
